PFLOCK Report

Andres Calderon

University of California, Riverside

December 6, 2019

Validation is done...

- ▶ Working with 'berlin' dataset[1].
- ▶ 18K moving objects during 11 timestamps.
- ▶ Epsilon values: [50, 75]
- ▶ Mu values: [3]
- ▶ Delta values: [3]
- ▶ Results are identical:
  - ▶ 17339 flocks with E=50
  - ▶ 34682 flocks with E=75

---

[1]Cannot work with LA dataset because BFE does not manage **oid** as **Long**

What's next...

- ► Cleaning LA_25K dataset.
- ► Running performance tests with LA_25K and LA_50K.
